AlbumEasy V4.2 to V4.4 Examples

This is an example of an informational page

This page has been created by means of the PAGE_START_INFO command with the optional NO_BORDER parameter

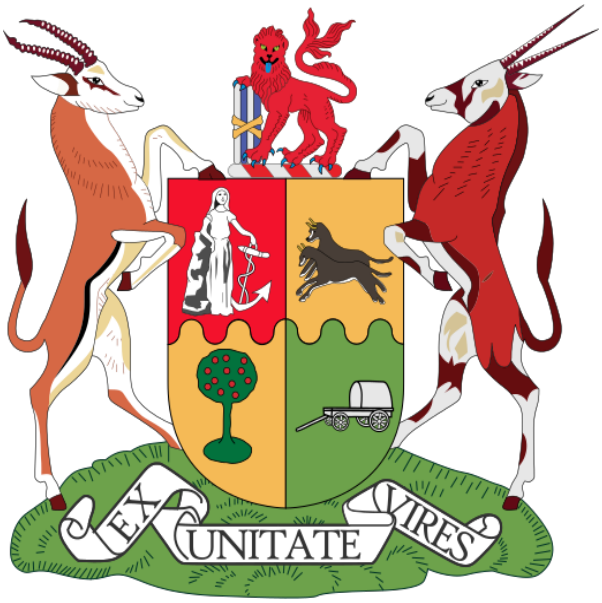

Informational pages may be used to provide additional information that is not intended to be part of the printed album. Another use would be for creating title pages.
Informational pages may be placed anywhere in the album and have the following characteristics:

- Do not include a title.
- Do not include headers or footers.
- Do not increment the page number.
- Do not process any commands that are part of a page start group.
- The optional NO_BORDER parameter can be added to suppress the page border.

Another example of an informational page.

This example includes a border.
It is used here as a title page

New and enhanced commands - AlbumEasy V4.2 to V4.4

**Boxes can be placed anywhere on a page
by means of the PAGE_ADD_BOX command.**

The PAGE_ADD_BOX command accepts an optional rotational value in degrees allowing boxes to be placed at an angle. This could be useful for long coil strips or envelopes.

New and enhanced commands - AlbumEasy V4.2 to V4.4

The ALBUM_STAMP_IMG_GREYSCALE_ON and ALBUM_STAMP_IMG_HIDE commands can be used to completely change the look of an album as illustrated by the four "albums" below. The first a DIGITAL album, the images are set to the actual stamp size. Next, a PRINT READY album with reduced size images, and if preferred, the images can also be grey-scaled, or completely hidden as in the following examples.
